

Senior Leadership Briefing
Hurricane Irma
Friday, September 8, 2017 (5:00 a.m. EDT)
Updates in Blue

Current Situation:

At 5am EDT, Hurricane Irma was located 495 miles southeast of Miami, Florida with maximum sustained winds of 155 mph and a minimum central pressure of 925 mb.

Irma is moving toward the west-northwest near 16 mph, and this motion is expected to continue for the next day or so with a decrease in forward speed. A turn toward the northwest is expected by late Saturday. On the forecast track, the core of the hurricane will be near the Florida Keys and the southern Florida Peninsula Sunday morning. Irma is forecast to remain a powerful category 4 Hurricane during the next couple of days.
